METROPOLITAN CLINICAL LABORATORIES

COMPREHENSIVE METABOLIC & LIPID PANEL

Patient Name: Jhon Doe
Patient ID: 44444444-4444-4444
Ordering Physician: Dr. Robert Chen, MD

DOB: 1980-05-12 (Age: 46)
Collection Date: 2026-10-15
Status: FINAL REPORT

Test Description	Result	Reference	Units	Flag
Fasting Blood Glucose	118	70 - 99	mg/dL	HIGH
Hemoglobin A1c	6.8	4.0 - 5.6	%	HIGH
Serum Creatinine	1.05	0.70 - 1.30	mg/dL	NORMAL
Blood Urea Nitrogen (BUN)	18	7 - 20	mg/dL	NORMAL
eGFR	> 60	> 60	mL/min/1.73m2	NORMAL
Sodium	140	136 - 145	mmol/L	NORMAL
Potassium	4.4	3.5 - 5.1	mmol/L	NORMAL
Total Cholesterol	215	< 200	mg/dL	BORDERLINE
HDL Cholesterol	42	> 40	mg/dL	NORMAL
LDL Cholesterol	138	< 100	mg/dL	ELEVATED
Triglycerides	175	< 150	mg/dL	HIGH

ENDOCRINOLOGY CLINICAL INTERPRETATION

CLINICAL IMPRESSION & RECOMMENDATIONS:

1. Glycemic Control:
Fasting blood glucose of 118 mg/dL and HbA1c of 6.8% indicate Type 2 Diabetes Mellitus with sub-optimal glycemic control.

2. Lipid Profile:
Total cholesterol (215 mg/dL), LDL (138 mg/dL) and triglycerides (175 mg/dL) demonstrate mixed dyslipidemia.

3. Renal Function:
Serum creatinine (1.05 mg/dL) and estimated GFR > 60 mL/min remain within normal baseline parameters.

MANAGEMENT PLAN:
- Initiate Metformin 500mg BID orally with meals.
- Continue Atorvastatin 20mg once daily at bedtime.
- Dietary lifestyle modifications: low glycemic index diet and 150 min/week moderate aerobic activity.
- Repeat complete metabolic profile and HbA1c in 12 weeks.
